DETAILED ACTION

1. Receipt is acknowledged of the Amendment filed 4-02-2004.

Allowable Subject Matter

2. Claims 1-53 are allowed.
3. With regard to independent claims 1, 15, and 45, the prior art of record, Nishio et al. discloses a backlight system having a light guide, a light source, and a back reflector comprising a multilayer reflector. However, Nishio does not disclose that the multilayer reflector reflects at least 80% of normal light and at least about 80% of light incident at an angle of 60 degrees from normal. On the other hand, Schrenk et al. teaches a multiplayer optical film reflecting at least 80% of normal light. However, Schrenk is silent with regard to the limitation that the multilayer optical film reflects at least about 80% of light incident at an angle of 60 degree. Further, Schrenk and Nishio fail to disclose motivation to substitute Shrink's multiplayer optical film with Nihau's multilayer reflector. Hence, independent claims 1, 15, and 45 and their dependent claims are patentable over the prior art of record.
